- Took part in code reviews and used Jira for project management.
- Collaborated with other members of the Digital Product Development team and with the art and creative teams.
- Solo developer for research project regarding a new application format using Unity, C#, and C++.

### EDUCATION

#### Rochester Institute of Technology ·

Aug. 2016 to May 2020

BS Game Design & Development 2020

Cumulative GPA: 3.92

Minor: Music and Technology

### SKILLS

**PROGRAMMING:** C/C++, C#, Python

**GAME DEVELOPMENT:** Unreal Engine 4, Unity, AI

**WEB DEVELOPMENT:** HTML, CSS, JavaScript, Node.js, React

**OTHER:** Git, Perforce, Blender, Jira

### PROJECTS

#### FT Engine (Academic Project)

- Developed a DirectX 11 Game Engine in a team of four.
- Programmed Mesh, Material, Camera, Particle, UI, and Lighting systems using C++ and HLSL.
- Implemented a robust Component-based architecture.

#### Dark (Personal Project)

- Created a procedurally-generated horror tech-demo with Unreal Engine 4 and C++.
- Implemented backtracking/depth-first-traversal algorithm to generate random 3D mazes.
- Incorporated horror aesthetic and an escape mechanic around the random mazes.

#### Automaestro (Personal Project)

- Developed music application with Unity and C# that allows anyone to play music on a virtual piano without worrying about playing the correct notes.
- Designed and implemented project architecture.
- Published to Windows Store and implemented in-app purchases.

#### Space FPS Tech Art Demo (Academic Project)

- Created a first-person-shooter metroidvania demo with Unreal Engine 4 to practice Tech Art concepts.
- Used techniques such as Level Streaming, LODs, HLODs, and Material Optimization.
- Implemented gameplay features with C++ and Blueprints.
